

### DIMENSIONS

3"h x 10.25"d x 65"l

### MATERIALS

Anodized aluminum, tinted laminated glass, neoprene, and hardware.

### DESCRIPTION

We set out to fracture light. Created to function as either a shelf or a wall console, the Violet Split is a study of structure and light. Perfect for displaying a work of art, this minimalist structure is the result of reducing the components down to their functional essence. Made from two satin brushed, anodized aluminum bars that have been machined with weapons grade precision, the bracket easily mounts to the wall and has micro adjustment built in for exact leveling. The 3/8" laminated glass shelf is color tinted, and casts extraordinary color shadows when placed in light.
